in the early 1300s dante alighieri set out to write the three volumes which make the
 up the divine comedy purgatorio is the second volume in this set and opens with
 dante the poet picturing dante the pilgrim coming out of the pit of hell similar to the
 inferno 34 cantos this volume is divided into 33 cantos written in tercets groups of 3
 lines the english prose is arranged in tercets to facilitate easy correspondence to
 the verse form of the italian on the facing page enabling the reader to follow both
 languages line by line in an effort to capture the peculiarities of dante s original
 language this translation strives toward the literal and sheds new light on the shape
 of the poem again the text of purgatorio follows petrocchi s la commedia secondo l
 antica vulgata but the editor has departed from petrocchi s readings in a number of
 cases somewhat larger than in the previous inferno not without consideration of
 recent critical readings of the comedy by scholars such as lanza 1995 1997 and
 sanguineti 2001 as before petrocchi s punctuation has been lightened and
 american norms have been followed however without any pretensions to being

critical the text presented here is eclectic and being not persuaded of the exclusive authority of any manuscript the editor has felt free to adopt readings from various branches of the stemma one major addition to this second volume is in the notes where is found the intercantica a section for each canto that discusses its relation to the inferno and which will make it easier for the reader to relate the different parts of the comedy as a whole
